Problem Statement

Smart Lender AI is an intelligent loan approval prediction system that leverages Machine Learning to predict loan eligibility based on applicant information such as income, co-applicant income, loan amount, loan term, credit history, education, employment status, marital status, dependents, gender, and property area. The system assists banks and financial institutions in making faster, more accurate, and data-driven lending decisions while minimizing manual effort, processing time, and human bias.

Customer Problem Statement Table

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A banking customer applying for a loan.	Determine whether my loan application is likely to be approved before submitting it.	The traditional loan approval process is time-consuming, involves manual verification, and provides no immediate feedback.	Banks evaluate multiple factors such as income, credit history, employment status, education, loan amount, and property details before making lending decisions.	Uncertain, anxious, and concerned about whether my application will be approved after waiting several days.
